

### Adjustable Pallet truck

With the possibility to adjust the pallet truck to different pallets sizes this solution becomes very flexible.

Adjustable in three steps.

Equipped with pallet holders and towing package.

### Chair truck

This trolley is perfect when you need to move a lot of chairs.

And when you are done, this trolley can be folded away so it takes minimal place to store.

### Profile trolley

Store and move your profiles and pipes quick and easy.

With five levels on every side it has room for a lot of material. And always with easy access to them.

### Packing table

A movable packing table with shelves on each side that you easily fold away.

A writing table and a small shelf in front of you for easy access.

### Picking trolley

Constructed for supermarkets when they pick products for their customers that choose to order online.

Top shelf can be pulled out, smart dividers, writing tablet and a lot of small smart functions that make the picking process easy.

### Picking trolley

With six shelves on every side this trolley has plenty of room for trays.

To make it easy to pick material from the trolley all the shelves are tiltable.

### Net trolley

A simple trolley used in containers for collecting clothing. Simply place the trolley in the container and remove it when it is full.

One side is possible to open for easy access.

### Transportation trolley

From our standard products we make some small changes and the trolley is suitable for a new application.

Originally used as a board trolley and now used to store and move foldable tables.

### Cable trolley

Same idea as a sack truck, easy to move things around.

This was specially made to store and move cable drums.

### Pallet truck

Sometimes you need a trolley to suit your custom made pallets or other large items.

To secure and make this trolley handle heavy loads we added an extra pair of castors.

### Pallet truck with pipes

With pipes in order to hold the cargo in the right place.

### Pallet truck

A pallet truck can be used in a lot of different ways.

Here we simply added a board on top of it, to make it suitable for handling small components.

### Transport trolley with lock

Sometimes you need to protect your products from theft. This trolley has easy access from both sides, and secure with a locking function.

Robust construction keeps your goods safe.

### Table trolley

A table trolley with unusual measurements, suitable for narrow aisles.

Braked castors and robust construction make it very durable.
